PRIME SERIES ADJUSTABLE TOP SHELF ASSEMBLY

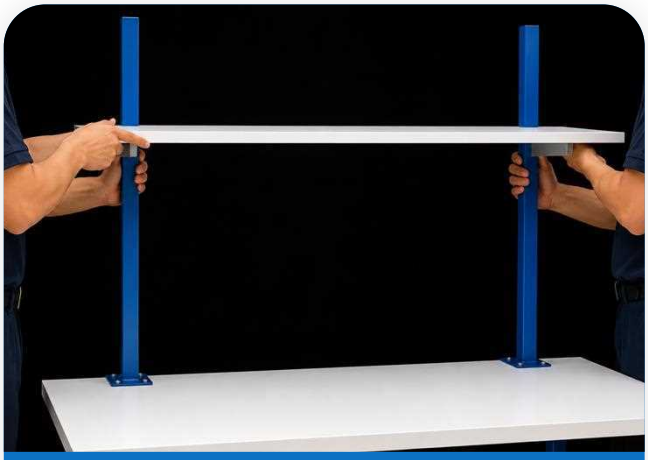

STEP 1

Align the shelf brackets over the pre-assembled screws, ensuring the flat side of each bracket faces the ends of the shelf. Securely tighten all screws.

STEP 2

Slide each bracket forward until the shaft of the screw engage into the narrow locking section of the mounting slots.

STEP 3

Raise the top shelf above the workstation uprights and carefully lower it into the desired mounting position.

STEP 4

Align the adjustment knob shaft with the recessed locating point on the rear side of the upright frame, then hand-tighten until secure. Avoid over-tightening.
