PRO SERIES BENCH ASSEMBLY

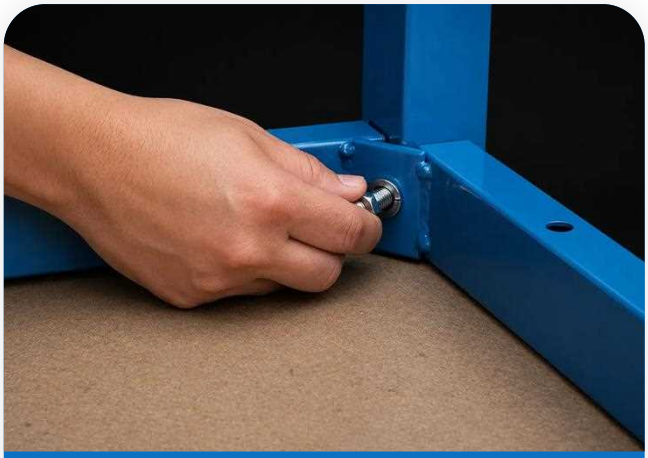

STEP 1

Position your Digital Workbench™ workbench on a stable, elevated surface with the carton seam facing upward. Carefully open the packaging along the seam, ensuring the protective cardboard structure remains in place at this stage.

STEP 2. POSITION THE LEGS

For efficient assembly, we recommend a two-person team when working on multiple benches. Carefully position the legs on the work surface. For Static Control benches, ensure the wrist strap jack is oriented toward the front side of the leg.

STEP 3. INSTALL FASTENERS

Insert one bolt with a lock washer into each leg. Ensure all bolts are properly seated and hand-tightened before proceeding to final tightening.

STEP 4. TIGHTEN BOLTS

Tighten each bolt until the lock washer is fully compressed (flat). Do not overtighten—no additional torque is required beyond this point.

STEP 5. INSTALL ACCESSORIES (IF APPLICABLE)

If additional accessories were ordered, proceed with their installation according to the provided instructions.

- Drawers
- Uprights
- Articulating LCD Monitor Holder
- Overhead Light
- Roll Holder
- Adjustable Top Shelf
- Bin Box Rails
- Computer Holder
- Adjustable Footrest
- Back Mounted Power Strips
- Free-standing Shelves

STEP 6. FINAL POSITIONING

Carefully turn the bench upright. Assembly is complete.
