PRO SERIES – DRAWER INSTALLATION

STEP 1

Install the drawer assembly during workstation frame assembly. Align the two mounting tabs on the underside of the drawer housing with the corresponding mounting tabs on the workstation frame, then slide the drawer assembly into position. Ensure the assembly is centered for proper engagement.

Note: The drawer is removed from the case to make this photo, but you don't need to remove it before assembly

STEP 2

Reinstall the mounting bolts and tighten securely to complete the installation.
